Technical Benefits of GlassKote™

- Long Lasting, 10 Year Warranty against discoloration, cracking, and peeling.
- Ease Of Installation, very similar to mirror applications.
- Great Adhesion, ASTM tested up to 2,100 psi.
- Environmentally Friendly, isocyanate free
- Track Record, technology used in the field for 25+ years.
- Selection, standard colors, custom coloring available, can be applied to any of our pattern glass.

POSSIBILITIES

For decades, glass manufacturers have worked diligently in the quest to devise a process to permanently bond color to glass. Now, GlassKote™ has achieved the breakthrough with a revolutionary agent that is mixed with color compounds to create a durable, colorfast finish. Coastal Glass Distributors is now a licensed applicator of the revolutionary GlassKote™ process.

GlassKote™ provides a virtually limitless palette of colors for a multitude of applications. You can now create an open airy feeling with reflective qualities that can only be achieved through the use of color coated glass. Coastal Glass Distributors offers 27 standard colors from vibrant hues to subtle tones. We use low iron glass, ensuring that true, rich color is achieved. Colors can be combined with any of our textured glass for endless design possibilities. Our color coated glass can easily be combined with materials such as wood, metal or stone to create environments from modern and sleek to nostalgic prairie-inspired designs.

The GlassKote™ process provides a unique option for many interior applications such as feature walls, doors, cabinetry, backsplashes and countertops for kitchen and bath, and shower surrounds. You will discover a world of possibilities and the most exciting alternative in interior design when using GlassKote™ color coated glass.

*All colors are opaque and best used in interior applications. Installation procedure is similar to mirror applications, call for compatible materials.
